## Med Surg & Acute Rehabilitation Services Offered in State-of-the-Art Units

Medical Rehabilitation is an advanced short-stay program designed for patients that are "on-the-go". Located on the 4th Floor of Surgeons Choice Medical Center, this 30-bed unit specializes in Trauma, Orthopedics, Neurosurgery and General Medical Surgical conditions. This Unit features spacious private and semi-private patient rooms. Each patient is assigned to a board-certified physician to supervise treatment. Upon admission, each resident receives a complete physical examination. A comprehensive treatment plan is developed by our multi-disciplinary team.

Comprehensive rehabilitation care includes physical, occupational and speech therapies with physicians board-certified in Physical Medicine and Rehabilitation. A social worker is assigned to each resident to guide individuals and their families through services that are available and to address concerns and questions.

**All levels of rehabilitation are designed to meet the needs of our patients by utilizing an interdisciplinary team approach.**

Common conditions requiring rehabilitation can include:

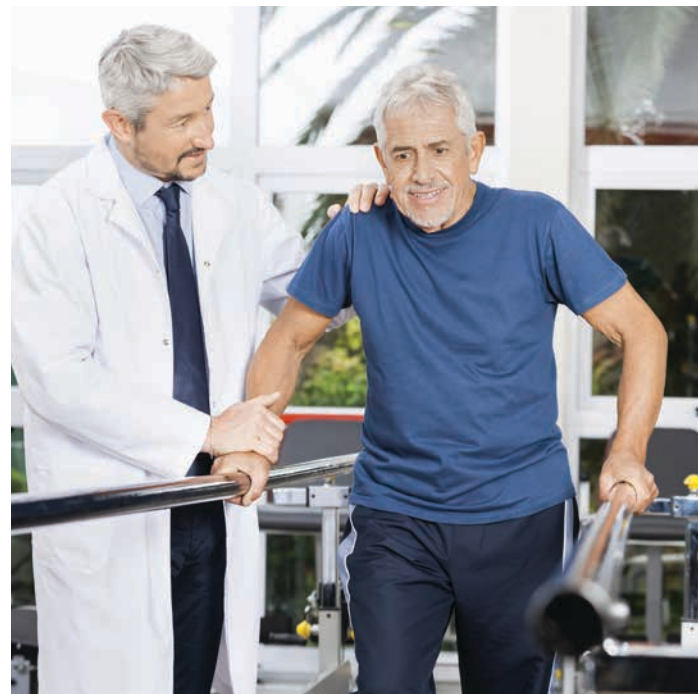

- Joint Replacements
- Fractures
- Amputation(s)
- Multiple Trauma
- Severe or Advanced Osteoarthritis
- Stroke
- Neurological Disorders
- Cardiac and Respiratory Rehabilitation

## About Our Facility

It's personal here, we want you to know we are also focused on bringing you kind, personal, and professional care. It is our privilege to care for you.

Amenities we offer at no cost to our patients:

- Cable TV
- Local phone calls
- On-site parking
- Private/semi-private rooms
- Rooms with personal amenities for patients
- Home-style cooking from our full-service kitchen

## Medical Rehabilitation Admission Criteria

### Program Description:

The purpose of the SCMC Medical Rehab is to provide a cost-effective quality alternative for patients requiring continued inpatient care for post-surgical conditions or post-medical conditions. This setting may be in lieu of an admission in a designated acute inpatient rehabilitation (IPR) setting or skilled nursing facility (SNF).

**The following criteria will be used to determine eligibility of the candidate for admission.**

- The patient has a disability which shows reasonable

prognosis for significantly increased function as a result of therapy services.

- The patient must show the ability to participate in a minimum of 2.5 hours of therapy up to 3 hours of therapy per day, 5 days out of 7 days per week. Must need 2 therapies requiring at least minimum assistance.
- The patient must show a willingness to participate in therapy. The patient may need ongoing encouragement from therapy, nursing staff, but must eventually participate in the plan of care.
- The patient must have adequate community support upon discharge. (family, friends, community agencies)

- There are realistic recovery goals which can be met in the inpatient program setting.
- A probable discharge destination with an approximate length of stay of 6-8 days must be determined
- The patient's condition is stable given the parameters of the diagnosis.

### Diagnosis Examples:

*The following are examples of diagnoses previously admitted to Surgeons Choice Medical Center Inpatient Program:*

#### Orthopedic:

- Total Knees, Hips, Pelvic Fractures
- Upper Extremity Fractures
- Spinal Stenosis
- Vertebral Fractures
